NEWS FROM THE RRASU

Research and Regulatory Affairs Support Unit, CIUSSS-ODIM

ACCESS TO PERSONAL
INFORMATION

>>> CADRISQ

CADRISQs are highly secure spaces where you are allowed to consult, after having entered into an agreement with the [ISQ](#), administrative data originating in particular from the fields of health and education. Our establishment is currently trying to assess the needs of our community regarding the opening of a CADRISQ in our spaces. Keep an eye out for that and contact the administration of your research centre to express needs for a CADRISQ.

CANTRAIN <<<

In collaboration with the [Cantrain](#) organization, we wish to develop standardized clinical research training aimed at the entire research community, from trainees to clinician-researchers. The free training courses will cover various research activities, including research protocol design, good documentation practices, participant recruitment and data management.

STANDARDIZED CLINICAL
RESEARCH TRAINING

»»» BILLING SCALE 2024

Public establishments in the health and social services network are obliged to bill private companies for fees related to various services provided by the REB, including various assessments, authorizations, follow-ups, and renewals. These fees are updated annually by the MSSS. For more information, please consult the document titled “Barème de facturation MSSS (2024) (.pdf)” (French only) in the Nagano documentation section.

TRAINING FOR SIL-P

For over a month, a message has been circulating to the effect that training in the use of the Provincial Laboratory Information System (SIL-P) was required in order to obtain Optilab services. This training is limited to those who require access to the system, which is not normally the case for research teams. The procedure for accessing Optilab services for research purposes is therefore not affected by this new measure.

»»» RESEARCH ETHICS BOARD

Please find below the next project submission deadlines

Mental Health and Neuroscience subcommittee:

July 22 and September 9

Biomedical subcommittee:

July 24 and August 21
