BOARD

>>> REGISTRY OF SCALES AND FORMS

The REB registry of scales and forms is now operational in Nagano in the "File Upload" section, under the question "Validated Tools Library". It allows you to select the scales and forms that you will use in your project rather than having to upload them one by one to the platform. This registry will be updated annually. Feel free to use it.

SURVEY <<<

The RRASU, in partnership with the research centers, is examining the possibility of implementing a CADRISQ at the Douglas, which would allow on-site access to the various ISQ databases. An invitation to complete a survey regarding the interest in such infrastructure has been shared through various channels, including the Douglas Research Center newsletter. The responses to this survey will be crucial in supporting the request for the implementation of a CADRISQ and we strongly encourage you to complete it.

CADRISQ
IMPLEMENTATION

A vertical photograph of a wooden bookshelf filled with various books. The spines of the books are visible, showing different colors and titles. The books are arranged in rows, with some standing upright and others slightly tilted.

»»» RESEARCH SOPS DEVELOPED BY CATALIS

In an effort to harmonize research management processes across the health network, Catalis has developed new standard operating procedures (SOPs) that will complement our policies and procedures. These SOPs will be shared with you as they are adopted by our institution.

PRIVACY IMPACT ASSESSMENTS SECTION ON THE CIUSSS WEBSITE

An information section regarding various tools related to Privacy Impact Assessments (PIAs or EFVP in French) has been added to the CIUSSS' [research-dedicated web page](#). There, you will find links to a FAQ, help guides, a presentation on PIAs, and other relevant tools.

»»» DOCUMENT REPOSITORY

In order to facilitate their access, the policies, procedures, and SOPs related to research management have been deposited in a [virtual space accessible to all](#). New documents will be added over the next few months, along with translated English versions. You will be informed each time new documents are deposited there.

>>> CANTRAIN

Do you know about CANTRAIN? It is a free online training platform on various clinical research topics, such as good clinical practices, informed consent, etc., aimed at the entire research community. Other services are also offered. Please visit [the website](#) for more details.

RECRUITMENT: NEW FEATURE IN NAGANO FORMS

Semi-Web, the developer of Nagano, has implemented a new feature in the forms to facilitate the tracking of participant recruitment. This feature allows research teams to update the recruitment status in a simple and quick manner. For now, this feature is only operational for clinical trials but it will eventually be extended to all types of projects and will enable data entry across the entire province.
